Los Angeles International Airport – LAX is one of the countries busiest airports. Here at Avis we operate a fleet of twenty two diesel powered buses on a start and stop basis, constantly picking up and dropping off our customers at their rental car or return flight.

Everyone knows Avis tries harder. That slogan applies to all phases of our entire operation. The use of the RCI fuel purifier on our diesel fuel dispenser pump saves us time, labor, and above all *money*. We are a service-oriented company; if a customer cannot reach our transportation, he can go to one of our competitors and we loose revenue. ***The RCI fuel purifier is the first line of defense, protecting our buses so we can be sure to meet our customers needs.***

Since we installed the RCI Technologies purifier, we have experienced no smoke or odor problems and our “TRY HARDER” buses are welcome anywhere at the airport.
