

**THE
BRIAR
CORPORATION**

I am writing to express my appreciation of your line of fuel filters. We purchased an FP 800 and installed it on a problem we had on a field diesel fuel tank. This solved the problem we were having with contaminates. I like the simplicity of the unit, **no** replacement parts. We can virtually forget about the unit.

We just purchased another FP 800 for another tank and expect the same great performance from this unit. We hope to continue to do business in the future with RCI Technologies, as we feel they will satisfy our needs in every way.
