RCI TECHNOLOGIES FUEL PURIFIERS

FP 1000-LS FUEL PURIFIER

**“WE HEARD ABOUT
RCI AND DECIDED TO
GIVE
IT A TRY”...**

Valdosta Railway is one of the many short line railroads now operating throughout the country. And, as everyone in the short line railroad business knows, we generally do not have the newest and most advanced locomotives. In our case we have two (2) 1950 vintage locomotives. The RCI purifier was installed on #184.

**“FILTER CHANGES HAVE
BEEN EXTENDED”...**

Our routine/normal maintenance required to keep this locomotive running on its daily schedule (prior to RCI installation) required changing or replacing the fuel filter every three days.

**“INSTALLATION WAS
SIMPLE”...**

The RCI Fuel Purifier was installed about 6 months ago and our fuel filter replacement interval has been extended to approximately twenty-one days. Your unit has saved us a considerable amount of money in the short time we've had it installed.

466 West Arrow Highway, Suite D
San Dimas, California 91773
(909) 305-1241 Fax: (909) 305-1245
www.rcipurifier.com

Installation was simple and the purging of your purifier is even easier. We should have one on every locomotive, especially those in service on the short lines.
